

- > Saving up to 50% of water
- > Up to 50% less \$\$\$ to heat up water
- > Lower CO₂ emissions

WATERSAVERS FAMILY

- 1 Not paying for wasted water.
- 2 Preserving ground water for drier seasons.
- 3 Saving water compressor and energy to run it.
- 4 Saving energy to heat water.
- 5 Saving water heater.
More people will shower in the same volume of water.
- 6 Lowering emissions by about 15 % (= heating + water heating).
- 7 Smaller solar tank necessary.
- 8 Smaller solar panel necessary to heat the water.
- 9 Lower water fee = lower sewer fee.
Not wasting water or energy.
